LANGUAGES AND TECHNOLOGIES

- Excellent: **Python, Java** Good: **Ruby, AngularJS, node.js, p5.js** Prior: **C++, Matlab**
- **Creative Technology, Design Thinking, Audio Signal Processing, Test Driven Development, Data Structures, Algorithms, Agile / Scrum**

WORK

Venture Design Fellow

June - August 2016
San Francisco, CA

IDEO

- Rapidly prototyped the viability of several startup ventures centered around Internet Of Things and blockchain technology as part of the IDEO CoLab Summer Fellowship
- Full-stack development for Plenty, a peer-to-peer inventory management system for restaurants; built in Python / Flask

Senior Software Engineer - Recommendation Engines

April - May 2016
Oakland, CA

Pop Up Archive

- Designed and developed a recommendation system for audio podcasts for Ruby on Rails app
- Content-based recommendations from natural language processing of podcast transcripts
- Collaborative-filtering using user listening data to recommend podcasts based on 'similar users'

Software Engineer

July 2013 - February 2015
Mountain View, CA

Google

- Artificial Intelligence / Natural Language Processing team
 - Developed evaluation framework for NLP techniques that auto-extract ad headlines from advertiser's landing pages
 - Led the initiative to design and implement end-to-end testing for automatic extraction of product testimonials from Google Play reviews
- YouTube
 - Developed a plug-and-playable testing environment for YouTube Developers, providing a simple, flexible integration testing framework for ~500 engineers
 - Led the design and implementation of Test Therapy, an intelligent Python test-runner that automatically finds and instantly runs applicable unit-tests based on what files a developer is editing

Software Engineer in Test

December 2011 – May 2013
Boulder, CO

Spectra Logic

- Architected and wrote an extensible automation framework which integrates SCSI, Selenium, and XML protocols to test core product functionality

CREATIVE

Teaching Assistant — Creative Code Immersive

January - March 2016
San Francisco, CA

Grey Area Foundation For The Arts

- Teaching web skills (p5.js, node.js, HTML/CSS) and physical computing (Arduino, Raspberry Pi) to 12 students for building interactive art installations

EDUCATION

Bachelor's Degree in Electrical Engineering

Rutgers University

May 2009
New Brunswick, NJ

- Concentrations: Software Engineering, Digital Signal Processing
